

# Make Your Own Story

Create a C++ program that will simulate a simple "Make Your Own Story".

Prompt the user for their name, the pronoun they want to use (this will determine if you use "he" or "she"), name of their best friend, and favorite holiday. Using this information, create an 8 to 10 sentence story.

Example:

```
when Bob woke up he was very excited.  
Today was a special day - it was the day before Halloween.  
Halloween had always been Bob's favorite holiday.  
He was looking forward to spending the entire day with his best friend Susan.  
Susan was also very excited for Halloween.  
Since they were young, Bob and Susan had always spend Halloween together.  
Bob got up and called Susan on the phone.  
  
(etc.)
```
