# Comic Book Design Project

Create a 7 page comic book (plus cover page).

Use the steps outlined in the "The 8-step guide to creating and publishing your own comic book" link on [www.philgiansante.com/comicdesign/](http://www.philgiansante.com/comicdesign/)

All artwork and text must be 100% original.

Consider using topics that raise awareness of issues that are relevant to teenagers.

Be sure your book is appropriate for a school setting.

Study comic books for design inspiration.

Be creative with your layouts. An example of interesting layouts can be found below.
