Project
Impossible Photo

February 2019

Project - Impossible Photo

For this project, you will be creating an impossible photo.

An example would be someone posing lying down on a table and after the table is digitally removed, it looks like the person is floating in the air.

This photo must be staged and cannot be created using "composite" photo methods.

You must include "before" and "after" photos, as well as the tools used and steps taking.

Include at least 2 "in progress" photos showing your work.
